The simple solution for gooseneck trailer hook-up

The easy way to hook up any gooseneck trailer from the ground. No more banged heads, busted shins, or belt buckle scrapes on your truck bed!

The EZE-Latch is totally mechanical with only one moving part. It is very durable and trouble-free.

EZE INSTALLATION requires two $\frac{1}{4}$ -inch holes to be drilled in the gusset of the trailer, secure the EZE-LATCH to the gusset with the two $\frac{1}{4}$ -inch bolts, and fasten the cable to the coupler. Hardware and simple instructions are included in the kit.

EZE OPERATION Pull the handle down to release the coupler; then using any 3-foot long stick or handle, move the coupler either open or closed.

To order, call 866-231-8589 or email vernon@ezelatch.com
