

QuickHit for Dairy Cattle

SSI Corporation

Aids in the treatment and control of foot warts and other foot problems.

Contains NO antibiotics

DIRECTIONS

Use full strength or diluted 1:1 with water as directed. Clean are before treatment. Topically spray or apply to the area to the point of runoff twice a day. Improvement should be seen in 4 to 6 applications. Continue daily applications until problem is resolved. For severe cases apply QuickHit to a cotton ball or gauze, place on affected area and wrap. Remove wrap within 3 days and inspect.

Follow treatment with a maintenance program using **FootBath SuperBooster**.
