

# **Renew Gold™**

## ***Manna Pro®***

**A Unique Combination of Stabilized Rice Bran + Coolstance® Coconut Meal**

**High Performance Equine Nutrition**

**Balanced Nutritional Support:**

A Unique Combination of Max-E-Glo® Stabilized Rice Bran, Coolstance® Coconut Meal and Flax

**Supports Cool Energy:**

A Premium Replacement for High-Starch, Grain-Based Feeds

Renew Gold™ advances the concept of concentrated nutritional support for your horse's feeding program with the use of three sources of natural vegetable oils, a unique profile of high quality protein, and healthy digestible fiber. The combination of High Fat Stabilized Bran, Coolstance® Coconut Meal and Flax provides a uniquely efficient formulation that is lower in starch than grains or sweet feed. Renew Gold™ allows you to minimize the amount of feed concentrate needed in your feeding program, while our fermented yeast culture helps your horse maximize the nutrition naturally found in its hay or pasture.

**High Fat Stabilized Rice Bran**

As the people who introduced Stabilized Rice Bran to the equine nutrition market more than 20 years ago, we have proven its effectiveness in providing usable energy from natural vegetable fat without the behavioral issues often associated with high-starch, grain-based feeds. Stabilized Rice Bran forms the perfect foundation for Renew Gold™.

**Coolstance® Coconut Meal**

Years of experience and clinical research in Australia have shown the ability of Coolstance Coconut Meal to provide a very desirable combination of benefits to all classes of horses. The medium chain fatty acids in Coolstance are very easily digested and offer "cool" energy. The high quality proteins combined with those found in Stabilized Rice Bran provide a unique profile of amino acids not found in either ingredient alone. In addition, Coolstance Coconut Meal is a source of digestible fiber and contributes to a lower overall starch level in the Renew Gold™ formulation.

**Flax**

The Flax use in Renew Gold™ contributes the third source of natural vegetable fat along with a potent source of Omega 3 fatty acids to improve the Omega 6/Omega 3 relationship of our unique formulation to a ratio of 4.6 to 1.

## Yeast Culture

Yeast Culture is added to support an efficient environment for the digestion of the roughage portion of your horse's diet. Our company goal is to help you make an informed decision that will maximize the overall efficiency of both your horse's digestive systems and your feeding budget.

## Ingredients

Heat Stabilized Rice Bran, Coconut Meal, Flax Seed Meal, Fermented Yeast Culture, Calcium Carbonate.

## Guaranteed Analysis

Crude Protein	Min	15%
Lysine	Min	0.25%
Methionine	Min	0.14%
Crude Fat	Min	15%
Crude Fiber	Max	22%
Dietary Starch	Max	10.6%
Calcium	Min	1.6%
Calcium	Max	1.9%
Phosphorus	Min	1.3%
Copper	Min	28 ppm
Selenium	Min	0.66 ppm
Selenium	Max	0.9 ppm
Zinc	Min	22 ppm
Omega 6 Fatty Acids	Min	3.7%
Omega 3 Fatty Acids	Min	0.8%

**Best if stored in sealed container. Best if fed within one year of the date of manufacture. Store in cool dry place away from direct sun light.**

## For All Classes Of Horses

### Feeding Instructions for Horses

Less than one year of age	½ LB per day
One to three years of age	¾ LB per day
Mature Horse (low work load)	1 LB per day
Mature Horse (moderate to high work load)	1 ½ LB per day
Senior horse (fifteen years or older)	1 LB per day

Renew Gold™ is Calcium/Phosphorus balanced and may be used with both grass and alfalfa hay. Feed only as directed. Not intended for use in animals other than horses.

As with any change to your horse's feeding program, introduce Renew Gold™ gradually. Beginning with a 1/3 daily rate, increase to the full desired rate over a seven day period. Always provide your horse with a plentiful source of clean water. Please visit [www.equinerenew.com](http://www.equinerenew.com) for additional information.
