

Cornucrescine Daily Hoof Barrier for Horses

By Carr & Day & Martin®

For Wet Muddy Conditions

Strengthens and Protects
Prevents Cracks and Breakage
Reduces Shoe Loss

Includes Brush For Easy Application

WATERPROOF AND BREATHABLE

Daily Hoof Barrier creates a protective “one way barrier” allowing the hoof to both breathe and repel excess moisture. Excellent for use in wet and muddy conditions or prolonged stabling which, if damp underfoot can adversely affect both hoof health and shoe retention. Before application always ensure the hoof is clean, dry and free from oil and grease. Brush on daily just below the coronet band, covering the sole, frog and heel to give all around protection. Dries in minutes, with a non sticky, clear finish.

Warning: Flammable liquid and vapour. May cause an allergic skin reaction. Toxic to aquatic life with long lasting effects. Repeated exposure may cause skin dryness or cracking. If skin irritation or rash occurs: get medical advice. Avoid breathing vapours. Keep away from heat/sparks/open flames/hot surfaces. No smoking. Keep container tightly closed. Dispose of contents in accordance with local and national regulations. For external application to hooves only. Keep out of reach of children.
