

Clean-Up™ II

Pour-On Insecticide with IGR

Application on adult cattle to achieve optimal lice control
Greater than 1000 pounds (30 mL dose)

2 small squirts (2 mL each) one in front of poll and one behind poll so some material will end up on the forehead and some will be behind ears where the head and neck meet.

Set applicator gun to 13 mL. Apply one squeeze from in front of shoulder to mid-back then apply a second squeeze from tailhead to mid-back.

Total Dose

2 mL in front of poll

2 mL behind poll

13 mL from withers to back

13 mL from tailhead to back

30 mL total dose applied to animal

Dosing Instructions

Apply Clean Up II to cattle using 3 mL per 100 pounds of body weight, up to a maximum dose of 30 mL for all animals 1000 pounds or greater.
