SIZING GUIDE

In order to get the most out of the Legacy System Support Boot, correct sizing is important. To help you choose the size that is right for your horse, we have established two charts that will guide you to the perfect fit. Measure your horse's leg as shown below and refer to the Measurement Chart to determine the correct size range. Next, use the Cowboy Sizing System to make your final judgment or if a tape measure just isn't your style.

Measure the diameter of the **FRONT** leg at the cannon bone, mid-way between the knee and the fetlock.

HIND Legacy boots are designed to fit the bone structure of the hind legs in direct relation to the front legs. If your horse measures a medium in the front boot, he will also need a medium in the hind boot.

MEASUREMENT CHART

Small	7-1/4" - 7-3/4"
Medium	7-3/4" - 8-1/4"
Large	8-1/4" - 8-3/4"

COWBOY SIZING SYSTEM

Small	Fine Boned	or	Under 900 lbs
Medium	Medium Boned	or	900 - 1100 lbs
Large	Big Boned	or	Over 1100 lbs

This chart can also be used as an overall guide for Classic Equine boots.

80% of horses wear the same size bell boots as they do Legacy boots. So if your horse needs a medium Legacy, he will most likely also need a medium bell boot.

The patented Cradle feature of the Legacy is specifically designed to conform to the back of the fetlock, mirroring the natural ligament structure of the leg. Unlike other "sling" boots, it is important to pull the cradle snug and straight around the back of the fetlock when applying.
