

Coat Defense® Canine & Cats Trouble Spot Drying Paste

Horsepowder

Quickly Treats:

- Broken Skin
- Wounds
- Weeping Hot Spots
- Oozing itchy bug bites
- Humans love it too for bites, stings, poison ivy, acne, splinters, etc.!

Our products are non-toxic, crafted from only safe, readable ingredients, and contain no fillers. COAT DFENSE® is proudly handmade in Ashburn, VA.

Directions:

- Gently clean any dirt or debris from treatment area. Flaky skin or scabs are ok. **DO NOT pick off any existing scabs.**
- With one hand, gently push back fur so that the area is exposed. With the other hand, use fingers to apply a coating of the paste to the hotspot as if spreading peanut butter on a piece of bread. **Do not rub in.**
- **Note:** Try to avoid applying paste to fur. The paste is not harmful, though it will dry like a scab and require bathing or brushing to remove.
- Paste will dry to a near white shell. It is also effective if thinned out with water or witch hazel. Some breeds have coats that need a thinner viscosity to stick to skin.
- Avoid applying the paste into paws, on joints or in skin folds. The scab that forms is abrasive.
- Allow at least 2 days for skin cells to knit together under its protection. Use a wet cloth or water to remove.
- Reapply as needed until skin is completely healed.
- Use **Coat Defense® Canine & Cat Daily Preventative Powder** to prevent future flare-ups. It's a game changer for prevention!

Notice: For best results, discontinue use of shampoos containing SODIUM LAUREL SULFATE, CHLORAHXIDINE, COAL TAR, and SALYCILIC ACID. **If using medicated shampoos with these ingredients, we recommend waiting 3 days to apply our paste.** These chemicals are known skin allergens and remove the protective

oils and microbiome that are essential for skin wellness and required by the immune system to provide true healing.

Ingredients:

Proprietary blend of sodium bicarbonate, maranta arundinacea (arrowroot) powder, bentonite clay, zea mays (corn starch), witch hazel, argan oil, hempseed oil, organic cedrus atlantica oil (cedarwood oil).
