

Fishbiotic Fluconazole

Fishbiotic

100 mg

10 Tablets

This product is an antifungal. It is effective against certain fungal fish infections. It also works to kill byopsis and green hair algae in mixed reef tanks. **USES:** Fungal fish infections such as ichthyoponus hoferi and saprolegnia.

DIRECTIONS: Turn off skimmer for first 3 days. Activated Carbon and phosphate remover can be used after 3 days, but remove other chemical filtration. Empty one capsule for every 10 gallons of tank water (20mg per gallon) into high flow area in sump. After 14 days perform a minimum 30% water change. Do not overdose. Filter socks are recommended during treatment in order to help clean the aquarium.

PRECAUTIONS: For aquarium use only. This product is intended for exclusive use with ornamental fish and/or ornamental organisms, and is not intended for use with fish for human consumption. For those allergic to this antibiotic, use gloves when handling.
