

Fishbiotic SMZ/TMP

Fishbiotic

SMZ/TMP 800 mg/160 mg

30 Tablets

Sulfamethoxazole and Trimethoprim combination is an antibiotic that works by eliminating the bacteria caused by many types of infections. **USES:** Infected Eyes, Fin or Tail Rot, Skin Ulcerations, Pop-Eye, Columnaris Disease, and Gill Disease.

DIRECTIONS: Use one tablet per ten gallons of water. Dissolve the tablet by placing directly into the tank. This amount will dissolve rapidly and circulate through the water. Treatment in a hospital tank is recommended. Treat the tank every other day for a full 5 days (a minimum of 3 treatments is recommended). Repeat a full 5 day treatment after 3 days if necessary. To avoid stress to the fish due to oxygen depletion during treatment, use continuous filtration but remove carbon from the filter since it will remove, by absorption, the antibiotic from the water.

PRECAUTIONS: For aquarium use only. This product is intended for exclusive use with ornamental fish and/or ornamental organisms, and is not intended for use with fish for human consumption. For those allergic to this antibiotic, use gloves when handling.

KEEP OUT OF REACH OF CHILDREN

INGREDIENTS: 800 mg Sulfamethoxazole
160 mg Trimethoprim activity

STORAGE: Store at controlled room temperature of 15°C to 30°C (59°F - 86°F).
