

Aqua-Cipro Forte

(Ciprofloxacin)

Controls Common Bacterial Infections in Fish

Each Tablet Contains:

Ciprofloxacin 500 mg

Directions:

Pre-dissolve one tablet (500 mg) per 2 gallons of water in a small amount of water prior to adding to a hospital tank. Immerse for one hour. Repeat every day for 5-7 days with daily water changes after each treatment.

Caution:

For aquarium and ornamental fish only. Not for human use. Keep out of the reach of children. Not to be given to fish intended for food use.

Storage:

Keep container tightly closed and in a cool, dry place.

Please read label instructions carefully.

This product exerts a bactericidal action on gram positive and some gram negative bacteria. It is useful for the control of bacterial diseases of fish, which includes fin and tail rot and flexibacter infections.
