Kills Mosquitoes

For Outdoor Use

Just Add Warm Water and Shake

### **Active Ingredient**

Boric Acid ..... 9.04%

**Other Ingredients** ..... 90.96%

Total ..... 100.00%

KEEP OUT OF REACH OF CHILDREN

### **CAUTION**

PRECAUTIONARY STATEMENTS

**Hazards to Humans and Domestic Animals: CAUTION:** Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking,, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse. Wear a long-sleeved shirt, long pants, socks, shoes and waterproof gloves.

## **First Aid**

**If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**If in Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a Poison Control Center or doctor, or going for treatment. For non-emergency information on this product, call (1.844.625.2742). For additional information on this product including health concerns, medical emergencies or pesticide incidents, you may call the National Pesticide Information Center at 1.800.858.7378, Monday through Friday, 8:00 am to 12:00 pm PST, or at <http://npic.orst.edu>.

## **Directions for Use:**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Use Restrictions:** For outdoor use only.

**Application Directions:** Use outside on the perimeter/property line. Use Sites: On the perimeter/property line of residential, multi-family, commercial, industrial, municipal, institutional, research, recreational, health care, educational, hospitality properties, and agricultural buildings and other man-made structures including garages, home greenhouses, outbuildings, and landscape beds.

**Outdoor Applications:** Prepare Spartan Mosquito Pro Tech by removing all contents from the box. For each tube, remove the temporary white cap and fill with WARM water to the fill line indicated on the back of the tube. Replace white cap. SHAKE THOROUGHLY. Remove white cap. Attach hooks to black caps for hanging, and secure the black caps to the top of the tubes. Hang the tubes along the perimeter/property line to be protected, each tube no more than 180 feet apart. If the area to be protected is one square acre or less, and there are no major mosquito attractors such as a wooded area or a water feature, hang 4 tubes on the corners of the area to be treated. Hang the tubes at least 80 feet away from areas where people gather, since mosquitoes will gather near them. If you have woods, heavy vegetation, or a water feature that attracts mosquitoes, hang at least one tube near or in that area, 80 feet away from people. Place an additional tube near that area if outside of the protected zone. Hang the tubes approximately 6 feet above the ground and no more than 180 feet apart. The ideal place to hang tubes is on a large tree against the trunk on a sturdy branch, or just inside a bush where they will be shaded and be partially protected from rain. This prevents evaporation and allows some water replenishment

from rain. Ensure the water level remains above the WATER LEVEL LOW line for optimal performance. Periodically check tube water level and replenish with water to fill line. If a tube falls or gets knocked off and the contents empty, replace it with a new one. If the tube gets flooded due to heavy rains, dispose of the flooded tube and replace it with a new one. If able, soak up a spilled or flooded solution with absorbent towels and dispose in trash.

Four tubes will kill mosquitoes in areas one acre or smaller and areas with less mosquito pressure and deployed early in the season. Refer to Mosquito Emergence and Deployment Map on package insert for product placement timing. For areas with heavy mosquito pressure or that have wooded areas or water features that can attract mosquitoes or if deploying product later in the mosquito season, use 8 tubes placed at the corners and along the perimeter/property line of the area to be treated. Larger treatment areas greater than one acre will require additional tubes spaced around the perimeter/property line of the area to be treated (i.e. two acres will require 8 or more tubes depending on mosquito pressure and land features). Spartan Mosquito Pro Tech will remain effective for up to 30 days. Replace Spartan Mosquito Pro Tech tubes every 30 days.

### **Storage and Disposal**

Do not contaminate water, food, or feed by storage or disposal.

**Storage:** Store in a cool dry place. Do not store where children or animals may gain access.

**Pesticide Disposal and Container Handling:** Nonrefillable container. Do not reuse or refill this container. **If empty:** place in trash or offer for recycling, if available. **If partly filled:** call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
