Perdue®

Arrive. Thrive. Recover.

Electrolytes + Probiotics + Oregano

A Water Supplement to Support Moderate Stress

For All Ages

Add to Water

Makes 45 Servings

Recover Plus™ To Support Moderate Stress

Even with the best care your birds can still become sick, injured, or affected by moderate stress, which can be devastating to your flock.

At Perdue, we have been caring for chickens for more than 100 years. In fact, the backyard flock of our founders, Pearl and Arthur Perdue, started it all! To this day, we remain dedicated to raising strong, healthy, and happy birds through science and innovation.

Stress reduces the function of the immune system and provide bad bacteria and viruses the opportunity to flourish. Causes of moderate stress for chickens include extreme weather changes, social hierarchy, and exposure to germs. If left untreated, moderate stress can lead to more severe stress, disease, injury, and even death.

Chickens are prey animals and tend to hide their vulnerability. Knowing your chickens are stressed can be a challenge but early detection can prevent serious health conditions. Chickens can tell us they are experiencing moderate stress by expressing certain behaviors:

Panting and labored breathing

Lifting wings away from body

Reduction in appetite

Diarrhea and pasty butt

Dirty Eggs

A stressed chicken needs more than just feed. Providing probiotics, oregano, and electrolytes during those stressful periods can support the health of your chickens by helping to reduce bad bacteria and prevent dehydration. FlockLeader™ Recover Plus™ promotes health and reduces the risk of further stress.

Recover Plus™

PRODUCT PURPOSE	AGE	SIGNS AND SYMPTOMS
Support during moderate stress	All birds	Panting and labored breathing Lifted wings Loss of appetite Diarrhea / pasty butt Dirty Eggs

Directions for Use

Add one teaspoon of FlockLeader Recover Plus per gallon of water. During times of stress or hot weather we recommend applying FlockLeader Recover Plus for 7 consecutive days. Discard any unused solution after 24 hours. This product can be used on all poultry species.

Guaranteed Analysis

Not less than 4.0×10^8 CFU/g total lactic acid producing bacteria (*Lactobacillus rhamnosus*, *Lactobacillus casei* KE01). Equivalent to 2.0×10^9 CFU per gallon. Contains a source of live (viable) naturally occurring organisms.

Salt, min 2% max 2.5%

Potassium, min 4.6%

Magnesium, 867 ppm/dose

Vitamin A, min 10,000 IU/dose

Vitamin D3, min 1,778 IU/dose

Vitamin E, min 9.8 IU/dose

Ingredients

Maltodextrins, dried *Lactobacillus casei* KE01 fermentation product, dried *Lactobacillus rhamnosus* fermentation product, oregano, Vitamin A, Vitamin E, Vitamin D3, salt, potassium chloride and silicon dioxide.

Storage and Handling

Keep product at room temperature or cooler for extended shelf life.
