A Daily Supplement That Helps Maintain a Productive and Healthy Flock

8 Weeks +

Add To Water - Makes 45 Servings

Thrive™ A Daily Supplement That Helps Maintain a Productive and Healthy Flock

The life of a chicken looks simple on the surface. Believe it or not, chickens experience stress every single day. And they are experts at hiding it! A little extra care can help prevent daily stressors from taking control so your flock can Thrive™!

At Perdue, we have been caring for chickens for more than 100 years. In fact, the backyard flock of our founders, Pearl and Arthur Perdue, started it all! To this day, we remain dedicated to raising strong, healthy, and happy birds through science and innovation.

Just like with humans, stress can weaken chickens' immune systems and have negative effects on your flock. Stressors for chickens include egg laying, weather changes, predators, and social interactions. Probiotics help to keep a balanced digestive tract for proper absorption of nutrients that can support immunity. Supplementing with a daily probiotic supports your flock's immune system beyond feed to battle life's daily stressors.

FlockLeader™ Thrive™ is uniquely formulated for adult chicken to help:

- Immune and digestive support**
- Stress reduction**
- Support egg production**
- Reduce waste, odor, and harmful bacteria**

Thrive™

PRODUCT PURPOSE	AGE	SIGNS AND SYMPTOMS
Daily digestive support	Mature birds	Daily maintenance for health and wellness

Directions for Use

Add one teaspoon of FlockLeader Thrive per gallon of water.

Supplement FlockLeader Thrive daily in the water when your chickens are six to eight weeks of age. We recommend supplementing FlockLeader Arrive to your chicks before eight weeks of age. Discard any unused solution after 24 hours. This product can be used on all poultry species.

Guaranteed Analysis

Not less than 4.0×10^6 CFU/g total lactic acid producing bacteria (*Lactobacillus casei* KE01, *Lactobacillus plantarum*, *Enterococcus faecium*). Equivalent to 2.0×10^7 CFU per gallon. Contains a source of live (viable) naturally occurring organisms.

Ingredients

Maltodextrins, animal plasma, dried chicory root, dried *Enterococcus faecium* fermentation product, dried *Lactobacillus plantarum* fermentation product, dried *Lactobacillus casei* KE01 fermentation product, and silicon dioxide.
