Zesterra® is an all natural supplement designed for horses during times of stress, such as hauling, heavy training, foaling and during times of extreme heat or cold.

Horses with Active Ulcers or Symptoms: Give 1 ml per 100 lbs of body weight orally in the AM and PM for 14 days and then reduce to 1 ml/100 lbs once a day for 14 days. Move to a 0.5 ml/100 lbs daily maintenance thereafter. When these horses are under stress use 1 ml/100 lbs prior to the event (riding, weather change, environment change).

Older Horses/Hard Keepers: Give 1 ml/100 lbs orally for 10 days followed by 0.5 ml/100 lbs daily until desired weight is achieved. Once desired weight is achieved, give 1 ml/100 lbs two to three times per week to maintain results.

Ulcer Prone Horses/Horses in Rigorous Training: Follow the same protocol as outlined above for horses with active ulcers.

Respiratory Infections/Shipping Fever: Give 1 ml/100 lbs orally daily until symptoms (cough, fever) subside. If antibiotics are prescribed, a daily dose of 1 ml/100 lbs should be used for at the least 10 days past the last dose of antibiotics.

Environmental Stress (Extreme Heat, Cold or Disease Outbreak): Give 1 ml/100 lbs orally prior to changes in weather or during disease outbreak.

Colic: Give 30 ml-50 ml orally at the onset of colic. You may use up to 100 ml. Please contact your veterinarian if colic persists.

Hauling: All horses should receive 1 ml/100 lbs orally the day before leaving and every day while away from home.

Ingredients: Colloidal silver, corn oil, guar gum, orange extract (for flavor), onion extract (for flavor), soybean oil, glycerin, vegetable oil, and natural apple flavoring.

Can be used in all livestock

Made in the USA
