

Aqua-Doxy

(Doxycycline 100 mg)

Controls common bacterial infections in **FISH**

Please read label instructions carefully.

This product is a broad spectrum antibiotic. It works by stopping the growth of bacteria. USES: Infected Eyes, Fin or Tail Rot, Skin Ulcerations, Pop-Eye, Columnaris Disease, and Gill Disease.

Each Capsule Contains:

Doxycycline 100 mg

Directions:

Use one capsule or tablet per 10 gallons of water. Open the capsule and dissolve directly into tank, in case of tablet dissolve directly into tank. This amount will dissolve rapidly and circulate through the water. Treatment in a hospital tank is recommended. Treat the tank every other day for a full 5 days (a minimum of 3 treatment is recommended). Repeat a full 5 day treatment after 3 days if necessary. To avoid stress to the fish due to oxygen depletion during treatment, use continuous filtration but remove carbon from the filter since it will remove, by absorption, the antibiotic from the water.

Cautions:

For aquarium use only. This product is intended for exclusive use with ornamental fish and/or ornamental organisms, and is not intended for use with fish for human consumption. For those allergic to this antibiotic, wear gloves when handling.

Storage:

Keep lid tightly fastened and store at controlled room temperature of 15°C to 30°C (59°F to 86°F).
