

Curicyn™ Pink Eye Solution

Eastern Technologies

All Purpose

- Fast Acting Formula
- Helps Promote Rapid Healing
- For the Treatment of Pinkeye and its Effects

Ingredients:

Purified Anolyte 96%
Hypochlorous Acid 0.015%
Lithium magnesium sodium silicate ... 2%
Sodium chloride (residual salt) <1%
Proprietary carrier <1%

Stability

Shelf life at least 2 years under normal storage conditions.

Disposal

No special disposal requirements for the Pink Eye formula.

Storage

Store at room temperature away from direct sunlight and heat. Twist close the dispenser after use.

For Animal Use Only.

Not For Human Use.

Recommended for use on equine, livestock, and companion pets.

Direction for Use

Must Shake Well Before and During Use. Adjust spray nozzle for a “stream” or “limited spray” pattern. Apply liberally to affected animal’s eye, ensuring good contact with surface of the eye. Cleans, soothes and helps reduce inflammation and effects associated with Pink Eye. Usually one treatment will suffice, but repeat 2-3 days as necessary.

Use Precautions

For animal use only. Contact your veterinarian and discontinue use if adverse conditions develop. Keep out of reach of children. For external use only. Safe if licked by animal.

Made in U.S.A.
