## 2 Pack

**Contents:** 2x Breakaway® Pheromone Collar

**CAUTION** KEEP OUT OF REACH OF CHILDREN

## How The Collar Works

This collar mimics your cat's natural pheromone that signals the area is familiar and safe, helping to calm your cat and reduce unwanted behaviors.

## How To Use The Collar

Place the collar around your cat's neck, adjust it to fit, buckle in place. You should be able to fit one or two fingers between the neck and the collar with the fingers flat against your cat's neck. The collar will release should your cat become entangled in an object like a fence or tree.

Calming pheromones are activated by your cat's body heat as our cat wears it. There may be a white powder-like residue on your pouched collar called bloom. Bloom means the pheromones are working and diffusing from the collar.

The Comfort Zone® Calming Pheromone Collar should be worn 24/7 indoors or outdoors. Open the pouch only when it is ready to place on your cat. Replace the collar every 30 days. The collar should only be worn on adult cats and not kittens.

- ♥ Proven to reduce urine marking in 89% of cats
- ♥ Helps cats adapt to a new place
- ♥ Use for travel or vet visits
- ♥ Most see results in 1-2 weeks
- ♥ Easy-release collar for safety
