Call Physician Immediately.

For a calm cat and a stress-free home

#### How Comfort Zone® Product Works

Comfort Zone® products mimic your cat's natural calming pheromone that signals the area is familiar and safe, helping to calm your cat and reduce unwanted behaviors. Most see results after two weeks. Results may vary by each individual cat.

#### Comfort Zone® products can reduce stress associated with:

- New pet for family member
- Moving to a new home
- Visitors to the home, especially around the busy holidays
  
- Each refill lasts up to 30 days
- Comfort Zone® refills work with all Comfort Zone® diffusers
- Use for cats & kittens

**Directions for Use:** Plug diffuser into an electrical outlet in a vertical position with the arrow pointing up, near where your cat spends the most time.

#### Easy Installation:

1. Rotate diffuser plug if needed.
2. Unscrew refill cap and insert into diffuser.
3. Insert diffuser upright into electrical outlet.

The diffuser must always be plugged into an electrical outlet and never upside down, sideways, or into a power strip/cord.

The diffuser features rotatable plug to ensure an upright placement in any electrical outlet and automatic safety shutoff to help prevent overheating. Improper use may cause the diffuser to become discolored, increase odor due to vapor residue buildup, and/or cause leaking.

**Ingredients:**

Isoparaffinic Hydrocarbon (a petroleum distillate) .....	85.00%
Analogue of Feline Pheromone .....	5.00%
Other Ingredients .....	10.00%

**Caution:** May be fatal if swallowed and enters airways. If swallowed, immediately call poison control center or doctor. Do NOT induce vomiting. If inhaled, remove from further exposure. If skin contact, wash with soap and water. If eye contact, flush thoroughly with water. Store in a well-ventilated area. Keep container tightly closed.

**Keep out of reach of children.**

**Not for Human Use.**

See package insert for complete instructions for use.
