

BOOST™

MATERNAL COLOSTRUM BOOSTER

30 g GLOBULIN PROTEINS

Adds 30 g Globulin Proteins to Maternal Colostrum
Ensuring Full Support for Newborn Calves

VITAMINS & MINERALS

Enhances Maternal Colostrum with Vital Vitamins & Minerals

MIXES INTO MATERNAL COLOSTRUM

Smoothly Mixes into Maternal Colostrum

LIFELINE Boost Colostrum Quality Booster

Instantly enrich maternal colostrum with additional globulin protein to ensure a strong start for newborn calves.

LIFELINE Boost is a colostrum enhancer that provides **30 grams of additional globulin protein** when mixed directly with maternal colostrum. Designed to support calves' early nutrition, Boost ensures essential immune support and vitality during the critical hours post-birth. This serum-based formula mixes smoothly with warm colostrum, making it fast and easy to use, even in time-sensitive situations.

Key Features:

- **Enhanced Nutrition** – Adds 30 g of globulin protein to colostrum, delivering better nutrition for every calf's first feeding.
- **Quick Mixing** – Mixes easily with warm maternal colostrum, achieving a smooth consistency in under a minute.
- **Consistent Performance** – Effective with each use, whether colostrum quality is good or needs extra support.

Additional Information

Boost is uniquely designed to mix directly into colostrum, unlike other supplements that require extra feedings. Simply stir 1/2 pound of Boost into 1 gallon of warm colostrum until fully dissolved, and feed immediately. Ideal for use with fresh or refrigerated colostrum, Boost ensures that calves receive essential nutrition, regardless of natural colostrum quality variations.

Measurable Value

Boost delivers instant nutritional support, leading to visible health benefits from the very first feeding. With improved immune strength, calves get the jumpstart they need for long-term well-being.

Choose LIFELINE Boost—the trusted choice to maximize colostrum's benefits and promote vibrant health in newborn calves.

BOOST™

MATERNAL COLOSTRUM BOOSTER

FEEDING DIRECTIONS

	Feedings	Boost	Warm Colostrum (105°F)
Boost	1 calf	1 3/4 cups (.5 lb)	1 gallon
	2 calves	3 1/2 cups (1 lb)	2 gallon
	5 calves	8 3/4 cups (2.5 lb)	5 gallon

FEEDING GUIDELINES

Boost should be mixed directly into warm colostrum, stirred until completely dissolved and given as the first feeding. Feed to the calf in one feeding via nipple feeder or esophageal feeder as soon as possible following birth. There is no need to warm colostrum that has just been milked from the cow. If colostrum has been refrigerated or frozen, it should be warmed to 105°F/40°C before adding Boost.
