FEEDING DIRECTIONS: Begin feeding Rescue Lamb & Kid as soon as possible following birth. Body weight determines amount of powder to feed. Give 18 grams of powder per pound of body weight over 24 hours. Use the chart as a guide:

FOR EACH FEEDING, MIX ¼ CUP (25g) OF POWDER WITH 4 OUNCES OF WATER

BODY WEIGHT IN POUNDS	NUMBER OF FEEDINGS
4	3
6	5
8	6
10	8

For example, an average 10 lb lamb would receive:
2 cups powder/ 32 oz water, over first 24 hours

Mix Rescue Lamb & Kid into warm (105 degree Fahrenheit) water. Stir until powder is completely dissolved. Feed to the lamb or kid via nipple feeder or esophageal feeder. Only mix enough powder for one feeding at a time.

TO FEED AS A SUPPLEMENT

For each feeding, mix 2 tablespoons of powder into 2 ounces of water. Feed *in addition* to colostrum. One tub feeds 6-14 animals.

STORAGE

Store at room temperature in a dry place. Use mixed product immediately – do not store.
