# Give Your Cattle Platinum Protection

Introducing the BOVIGEN™ Platinum Vaccine Line

BOVIGEN™  
Platinum Vaccines

# Virbac and BOVIGEN™ Platinum Vaccines: Here for you and your herd's health

BOVIGEN™ Platinum Vaccines from Virbac deliver quality protection against **viral respiratory** and both **viral and bacterial reproductive diseases** in the vaccine combinations you need to protect cattle at every life stage.

Modified-live vaccines stimulate a strong, long-lasting immune response, providing robust disease protection. In collaboration with manufacturer Diamond Animal Health, renowned for 60+ years of quality biologicals, we have an excellent safety track record with less than 0.01% adverse effects.<sup>1</sup>

Virbac, the fifth largest animal health company for ruminants globally, delivers experience, a reputation for quality, and a commitment to giving US veterinarians and producers more product options. We pride ourselves on being a nimble, service-oriented team committed to the well-being of your cattle and your operation for generations.

Virbac goes above and beyond to provide the **products, expertise** and **support** you need for continued success. Our sales representatives and technical services veterinarians are here to answer questions and work with your veterinarian to assist in vaccine protocol changes and use of BOVIGEN Platinum Vaccines in a manner that is right for your cattle.

## BOVIGEN™ Platinum 5 Vaccine

In a challenging business environment, keeping every animal healthy is crucial to success. Don't gamble with respiratory health. Set your herd up for growth with Platinum protection.

BOVIGEN™ Platinum 5 provides **comprehensive protection** against the most prevalent strains of bovine viral diarrhea virus (BVD) in the country,<sup>3,4</sup> including BVD types 1 and 2. Vaccine strain BVD 1a has demonstrated effectiveness against 1b<sup>2</sup> and effectively protects against infectious bovine rhinotracheitis virus (IBR), bovine parainfluenza 3 virus (PI<sub>3</sub>) and bovine respiratory syncytial virus (BRSV).

Safe for use in weaned calves as part of preconditioning and value-add programs and replacement heifer development programs. Labeled for use in pregnant cows and calves nursing pregnant cows provided they were vaccinated 30 to 60 days pre-breeding with another BOVIGEN™ 5-way modified live vaccine.

## BOVIGEN™ Platinum 5 L5 Vaccine

The future of your herd relies on the health of your cows and replacement heifers. Platinum protection is a worthwhile investment to manage risk and set your herd up for success.

BOVIGEN™ Platinum 5 L5 protects cows and replacement heifers from abortion-causing bacteria like *Leptospira*, and viruses that lead to reproductive issues, including bovine viral diarrhea virus (BVD) types 1 and 2, infectious bovine rhinotracheitis virus (IBR), bovine parainfluenza 3 virus (PI<sub>3</sub>) and bovine respiratory syncytial virus (BRSV). It offers cross-protection against *Leptospira hardjo-bovis* and comprehensive protection against *Leptospira canicola*, *Leptospira grippotyphosa*, *Leptospira hardjo*, *Leptospira icterohaemorrhagiae*, *Leptospira pomona* and the most prevalent strains of BVD in the country.<sup>3,4</sup> **Vaccine strain BVD 1a has demonstrated effectiveness against 1b.<sup>2</sup>**

Safe for use in pregnant cows and calves nursing pregnant cows provided they were vaccinated 30 to 60 days pre-breeding with other BOVIGEN™ Platinum 5-way modified-live vaccines. Effectively protects beef-on-dairy calves from *Leptospira*.

## BOVIGEN™ Platinum 3 Vaccine

Protect your investment and ensure cattle are ready for market with essential Platinum protection.

BOVIGEN™ Platinum 3 is ideal for use in feedyards at processing or revaccination. It delivers comprehensive protection against the most prevalent bovine viral diarrhea virus (BVD) strains including BVD types 1 and 2, and infectious bovine rhinotracheitis virus (IBR) in times when exposure to other respiratory viruses is less likely. Vaccine strain BVD 1a has demonstrated effectiveness against 1b.<sup>2</sup>

Safe for feeder cattle. Labeled for use in pregnant cows and calves nursing pregnant cows provided they were vaccinated, 30 to 60 days pre-breeding, with BOVIGEN™ Platinum 3, BOVIGEN™ Platinum 3 LP, BOVIGEN™ Platinum 5, or BOVIGEN™ Platinum 5 L5.

## BOVIGEN™ Platinum 3 LP Vaccine

For added protection against *Leptospira pomona*, choose Platinum protection that's ideal for feedyards or calf ranches.

BOVIGEN™ Platinum 3 LP provides protection against BVD types 1 and 2, IBR and *Leptospira pomona*. Vaccine strain BVD 1a has demonstrated effectiveness against 1b.<sup>2</sup>

Safe for use in feeder cattle, dairy cattle and beef-on-dairy calves. Labeled for use in pregnant cows and calves nursing pregnant cows provided they were vaccinated, 30 to 60 days pre-breeding, with BOVIGEN™ Platinum 3, BOVIGEN™ Platinum 3 LP, BOVIGEN™ Platinum 5, or BOVIGEN™ Platinum 5 L5.
