

Equilytes

Vetline®

The only electrolyte that absorbs IMMEDIATELY! Pre-race formula for a boost in speed and quick recovery.

Pre-chelated to allow it to absorb immediately! Instant absorption can be the difference between winning and losing. A superior proprietary blend of electrolytes and amino acids that gives your horse an IMMEDIATE BOOST to gain a competitive advantage. Compare to other brands that take 8 hours to begin working.

Ingredients: A proprietary blend of electrolytes and amino acids in a molasses base that horses love.

Guaranteed Analysis*	
Sodium Chloride	4g
Magnesium	600mg
Potassium	2g
Calcium	600mg
L-Glutamine	100mg
Amino Acid	22g

Dose: Place one to two ounces on feed daily. Increase up to 8 ounces before rigorous exercise or during hot weather. Can also be given before and after hauling to relieve fatigue. Absorbs instantly!

Tennessee Lane

“Equilytes are by far the most palatable and fastest-acting electrolytes on the market. The formula kicks in-immediately so that my horses drink well and their muscle tone is maintained throughout even the most challenging conditions. Whether it’s the Western States Trail 1-day 100-mile race, aka the “Tevis Cup,” or a 5-day 250-mile XP ride, Equilytes gives my horses the ability to power through, and to finish healthy. The powder mixes easily into their food, and the tubes are perfect to carry on the trail, sometimes I even help myself to a dollop, the stuff works. Aside from the fact that my horses stay hydrated and don’t cramp, I love the fact that it doesn’t burn their mouth or give them a stomach ache, dose after dose, they obviously appreciate that too. I used to mix up my own concoctions, trying to get the perfect balance of all the different ingredients...those days are over, I just use Equilytes and go!”
