Provides complete nutrition with digestive and immune support.

For use in dogs/ puppies only

Net contents: 12 oz (340 gram) POWDER

NEWBORN HEALTH

Breeder's Edge® Foster Care™ Puppy Milk Replacer supports the growth and development of puppies up to 35 days of age. Nutritionally balanced levels of proteins, fats and amino acids plus essential vitamins and minerals, provide puppies a complete food source.

Directions for Use:

NEWBORNS UP TO 35 DAYS OF AGE- When possible, the puppies should nurse from the mother for a minimum of 24 hours after birth to receive adequate colostrum. Small breed puppies should be fed every 3 hours. Large breed puppies should be feed every 4 hours.

Feed at rate od 1 mL (cc) of prepared milk replacer per 1 oz (30 grams) of body weight per feeding.

Mix with water (110°F- 120°F) at a rate of 1 tablespoon (Tbsp) of powder to 2Tbsp of water. Add water to mixing bowl first, then sprinkle milk replacer over the water, letting it sink into the water before mixing it with a whisk. Allow product to stand and cool to animal's body temperature (100°F- 101°F) for feeding. Gently agitate again prior to feeding.

SUPPLEMENTATION OVER 35 DAYS OF AGE- Puppies over 35 days of age, 1stp per 5 lbs body weight.

ADULT SHOW AND WORKING DOGS- Top dress food by sprinkling dry mix at rate of 1 Tbsp per 15 lbs of body weight, up to twice a day.

Storage:

Refrigerate remaining mixed formula. Shake well before use and discard after 24 hours.

Avoid excessive heat

Store powder at room temperature 58°F-86°F (15°C-86°C).

Use within 2 months of opening.

For intermittent or supplemental feeding only.

For use in domestic puppies and dogs only.

Keep out of reach of children.
