

Hill's Prescription Diet a/d Urgent Care with Chicken Canned Dog and Cat Food

Hill's Prescription Diets

How it helps:

- High levels of high quality and easily digestible protein and fat to meet increased energy needs
- High levels of clinically proven antioxidants to support immune system and offset oxidative stress
- Increased levels of B vitamins, potassium and added zinc to support recovery

How it works:

- Exceptional taste to encourage appetite in sick inappetent pets and promote early feeding
- Smooth, soft, moist and thixotropic consistency (stirring makes it more liquid) for maximum flexibility in feeding - by hand, bowl, spoon, and suitable for syringe or tube feeding

Additional Info:

Hill's Prescription Diet a/d is intended for intermittent or supplemental feeding only. Not recommended for long-term feeding (more than 6 months). Please consult your veterinarian for further information on how our Prescription Diet foods can help your pet to continue to enjoy a happy and active life.
